

The Moving Table, Flying Bridge and Silent Move offer unparalleled versatility and functionality, revolutionizing the way modern homeowners interact with and utilize kitchens.

Häcker Kitchens harmonizes form and function in the kitchen with movable island countertops

(Miami, FL) June 2024.

Häcker Kitchens, the leading German manufacturer of modern kitchen cabinetry and surfaces, enhances ergonomics in the heart of the home with the innovative Flying Bridge, Moving Table and Silent Move movable countertops. Crafted exclusively for installation on islands, these surfaces offer unparalleled versatility and functionality, revolutionizing the way modern homeowners interact with and utilize kitchens.

Flying Bridge in Ceramic

Press Release

The Flying Bridge serves as the primary countertop, designed to be placed across the full length of an island, atop a fixed secondary surface. The Moving Table, a more compact option can be placed to the left, right or center of the island, with a stationary countertop sitting adjacent. The Silent Move acts as an extension of the island with a base and countertop that slides parallel to the existing island. Each counter lends a unique set of enhancements to the cooking and entertainment experiences in kitchens of all shapes and sizes.

Moving Table in Silestone

“The ability to adjust the surface area of each countertop allows for customized workspaces, accommodating various tasks from food preparation to casual dining. By allowing kitchen surfaces to be repositioned as needed, homeowners can maintain comfortable positioning when moving about the room, minimize unnecessary reaching or bending as they perform daily activities, and define an accessible floor plan,” comments Andreas Gommeringer, President of Häcker Kitchens North America.

"This ensures that kitchens will be designed with inclusivity in mind and will be enjoyed for generations to come."

Silent Move in Ceramic

The Flying Bridge, Moving Table and Silent Move transform the kitchen island into a multi-functional hub. Whether used for food preparation, dining or as an additional workspace, these countertops provide flexibility to meet a variety of needs, making the kitchen more dynamic and user-friendly.
