

Showcasing new innovations, Häcker Kitchens brought form, color and material to the forefront of its exhibition space.

Häcker Kitchens Unveils Exclusive Kitchen Designs at EucoCucina 2026

(Miami, FL) May 2026.

From April 21–26, 2026, Häcker Kitchens welcomed international trade audiences to EuroCucina in Milan, presenting a curated selection of premium kitchen compositions at Hall 4, Stand C11–D16. Spanning 4,900 square feet, the installation showcased the Systemat and Concept130 product lines, bringing form, color and material into a cohesive dialogue fully aligned with the brand’s guiding principle, “The Art of Harmony.”

An Interplay of Shapes, Color and Materials

During the weeklong fair , Häcker Kitchens demonstrated how harmony can emerge not only from similarity, but from the deliberate interplay of contrasting shapes, colors and textures.

A ceiling installation of softly flowing fabric waves was paired with gently contoured, wood-veneered structural elements. These organic forms were set against a diamond-patterned woven façade, creating a layered architectural rhythm. This interplay extended into material details throughout the stand, including ratan-inspired textures on the handleless Systemat front AV

6085-GL. Glass, metallic finishes and natural stone further enriched the composition, reinforcing a seamless balance between contrast and cohesion.

The Aesthetics of Authenticity

Häcker Kitchens placed a strong emphasis on authentic materials across three Systemat kitchen concepts.

The handleless wood veneer front AV 6023-GL in elegant walnut stood out for its finely grooved surface, especially when paired with the brushed veneer front AV 6088. Rounded, wood-veneered end panels softened transitions between surfaces, reinforcing architectural continuity and material clarity.

A second kitchen concept in elegant oak referenced the cane weaving of the AV 6085-GL front, paired with the contemporary 10 mm frame design of AV 6065. Solid wood pull-outs and bronze-toned handles reinforced a refined, tactile quality, while interior cabinetry in natural fine oak carried the material narrative throughout the space.

A third concept, featuring the AV 7030 stone veneer in Black Star, introduced a bold material contrast. The natural stone surface was paired with subtly reflective polymer glass in metallic carbon (AV 5015), enhanced by lateral pocket doors and black chrome interior detailing in the larder units.

Harmonious Color Landscapes

Across the stand, a curated palette of soft sand-beige tones was combined with oak and walnut finishes, reinforced by nature-inspired colors including sand grey (AURA), truffle brown oak (BALI) and emerald green (PORTO Selection-GL).

Strategic accent colors added expressive contrast: vibrant blues in reception and bar areas, warm orange-red tones in lounge settings and a sculptural sideboard in bronze metallic lacquer. Together, these elements demonstrated the flexibility of Häcker Kitchens' harmony-driven design approach.

Transparency and Technical Innovation

Glass played a defining role in elevating both aesthetics and functionality. The refined glass version of the SLD pull-out

system introduced visual lightness within the AV 7030 Black Star stone veneer kitchen, reinforcing its premium character.

In adjacent dressing room applications, floor-to-ceiling cabinetry in a finely calibrated NCS finish was paired with a display-style tall unit, balancing closed storage with transparent presentation.

Comfort-Driven Engineering

Häcker Kitchens also highlighted advancements in functional hardware designed to improve everyday usability. A newly refined swivel fitting allowed appliances such as mixers and multifunctional devices to extend smoothly from cabinetry, optimizing space and accessibility.

Additionally, a concealed hinge developed specifically for glass cabinets with metal-framed doors preserved minimalist aesthetics while ensuring precision movement and structural stability. These innovations underscored Häcker Kitchens' commitment to integrating technology seamlessly into design.
