

Premium German Cabinetry Manufacturer Häcker Kitchens Makes U.S. Debut at KBIS 2022

Häcker will launch its latest innovations: PerfectSense® (a next generation surface that is soft touch and anti-fingerprint), Slim Line Drawer in Noble Titanium, Stone Finish made of 250-million-year-old slate (AV7030) and Modern Country (AV6055) cabinet door designs

(Miami, FL) February 2022.

With strong North American market demand for high-end, modern kitchen architecture and German innovation, 124-year-old Häcker Kitchens expands its focus in the U.S. as a first-time exhibitor at the 2022 Kitchen & Bath Industry Show (KBIS), booth S5324.

“KBIS attendees will experience Häcker’s diverse range of kitchen cabinetry, organization and surfaces uniquely designed for the American market,” said Andreas Gommeringer, President Häcker Kitchens North America.

“We’ve grown to an expert team of more than 2,000 employees across five production plants, ensuring that we continue to reliably fulfill the needs of our international customers in a timely manner. Häcker has not been severely impacted by supply chain

issues, delivering their custom lines in a normal 12-week timeframe to our North American clients,” adds Gommeringer.

Modern Country - Design meets Tradition.

Häcker’s newest collection, Modern Country (AV6055), a rustic cabinet door style from the Systemat collection is available in 12 standard colors (Crystal White, White, Magnolia, Taupe, Agate Blue, Velvet Blue, Light Grey, Pearl Grey, Lava Grey, Pastel Green, Graphite, Black), over 190 RAL/custom colors and are sized in American inch dimensions.

PerfectSense® New Generation Surface.

PerfectSense® is a new generation of surfaces which combines a high-quality look with an exceptionally velvety and smooth feel. The high-quality execution clearly stands out. Plus point: special anti-fingerprint properties effectively makes them very easy to clean.

Slim Line Drawer

A sturdy, yet impossibly thin 8mm double-walled frame made of high-quality stainless steel in Häcker’s new Noble Titanium interior color. The Slim Line Drawer is also available in a deeper box drawer with the option of sleek smoked glass sides.

Trendy Vignettes Reveal Endless Possibilities.

The possibilities are endless with Häcker’s European custom kitchen designs. Each display at KBIS 2022 offers a unique perspective from a Modern Country kitchen shown in Olive Green

and Pearl White, to an Urban kitchen with homey flair in industrial black, glass and walnut wood veneer that strongly resembles real wood. An extravagant "Living Room", shows that kitchen furniture can also be used to design other areas. Here the AV7030 stone veneer surface is made of a very rare 250-million-year-old slate that makes every kitchen unique. The high-quality overall impression is also underlined by the wine cooler positioned on the side, which blends perfectly with the AV6000 front material in black matte lacquer. The timeless "one" shelving system in black metal creates a relaxed ambience and offers a high degree of diversity for room design. Special highlights such as Pocket Doors in a pull-out cabinet allow customers to easily conceal cabinets when not in use. State-of-the-art technology including Häcker's structured MOVE organization system allows flexibility to combine drawer compartments to meet individuals' storage needs.

Press Release

Häcker Kitchens – The Company

Häcker manufactures modern fitted kitchens that meet the highest requirements in terms of quality, functionality, durability and design. Founded by Herman Häcker in 1898, the family-owned company, now in the fourth generation, supplies more than 60 countries on every continent. The North American headquarters is located in Miami, Florida. State-of-the-art production facilities combined with a proprietary fleet allow the company to meet customer requirements down to the last detail. Häcker Kitchens is the first kitchen furniture manufacturer whose entire product portfolio is climate-neutral. Throughout the years Häcker has represented consistent values in times of globalization, characterized by a high sense of economic, ecological and social responsibility, always emphasizing the company philosophy: Made in Germany. <https://www.hackerkitchens.us/>
